Jerry -

Here's the draft paper, along with the draft agenda for our workshop later this month. As you'll see, its not specifically about "fall X2"; its intended to set the stage for a discussion of how changes in the low salinity zone affect various aquatic species. Call me if you have any questions. Hope you are enjoying a beautiful weekend in Inverness. - KS

Subject: technical workshop on estuarine habitat: draft agenda, participants list, modeling paper, and bibliography (03/27/12) Tuesday (9:00-4:30) Sacramento

Dear Prospective Participants:

Thank you for your patience in awaiting this first installment of materials for the technical workshop. Please find attached the following:

A draft agenda:

The final list of prospective participants:

A draft paper on one- and three-dimensional modeling of X2 and the low salinity zone (yes, I know the numbering for the footnotes is a mess):

A short bibliography of the papers being analyzed by the Aquatic Science Center (ASC) to support the workshop. ASC is summarizing the key points of the papers, points of agreement and disagreement (and reasons thereof), and uncertainties.

I will send you the summary at least one week prior to the workshop, so please schedule some review time accordingly.

You're welcome to examine the papers included in the short bibliography at the following website:

<http://files.sfei.org/>
Username: X2workshop
Password: 27March2012

The website also features a long bibliography of all the papers we considered for analysis, but not pdf files for every paper.

Best Regards,
Tim
